FULL-STACK DEVELOPER WITH <B>MORE THAN :YEARS YEARS OF PROGRAMMING</B>, SINCE MY TRAINING AS A COMPUTER TECHNICIAN, AND BUILDING CLIENT PROJECTS SINCE 2019. I BUILD WHAT EACH BUSINESS NEEDS: WEBSITES AND LANDING PAGES, ONLINE STORES, WEB APPS, CUSTOM SYSTEMS AND SAAS PLATFORMS. I HANDLE THE WHOLE PROCESS —UNDERSTANDING THE GOAL, DESIGN, DEVELOPMENT, DEPLOYMENT AND SUPPORT— AND I ALSO CREATED AND RUN MY OWN PRODUCTS: <B>ASCENTO</B> AND <B>DOMUS</B> IN PRODUCTION, <B>GULA</B> IN DEVELOPMENT.

Full-stack developer with **more than 10 years of programming**, since my training as a Computer Technician, and building software for real businesses since 2019. I design, build and ship complete products: I learn how the operation really works, find exactly where it breaks and turn it into a system that runs on its own. I created and run my own SaaS products —**Ascento** and **DOMUS** in production, **GULA** in development— and build custom systems for companies that have outgrown paper, spreadsheets and WhatsApp groups.

WHAT I DO

- Fast, responsive websites and landing pages built to turn visitors into clients
- Online stores with catalog, cart, Mercado Pago payments and order management
- Web apps and PWAs: bookings, scheduling, client portals
- Custom systems and admin panels for internal operations
- Multi-tenant SaaS platforms with users, roles, plans and subscriptions
- Integrations: Mercado Pago, WhatsApp Cloud API, e-invoicing, maps and APIs

TECHNICAL SKILLS

Backend	PHP 8, Laravel, Filament, Livewire, MySQL, REST APIs
Frontend	Blade, Alpine.js, Tailwind CSS, JavaScript, PWA
Integrations	Mercado Pago, WhatsApp Cloud API, Web Push, maps and geocoding, e-invoicing
Infrastructure	Laravel Forge, Linux, Nginx, Docker, Git / GitHub, Cloudflare
Product	Multi-tenant SaaS, roles and permissions, product design, user research

EXPERIENCE

SaaS product builder — Own products, end to end — 2025 — Present

- **Ascento** (ascento.online) — End-to-end management SaaS for elevator maintenance companies: clients, buildings, technicians, work orders, digital delivery notes with photos, client portal, invoicing and payments via Mercado Pago. *In production.*
- **DOMUS** — Multi-tenant SaaS for property management firms: buildings, units, owners, maintenance requests, suppliers and invoices, with a dedicated panel for each role. *In production.*
- **GULA** — Discovery and management platform for restaurants: map-based search, digital menu, table ordering via QR. *In development.*
- Research with companies in each industry, product design, full-stack development, infrastructure and support.

Freelance Web Developer — Client projects — 2019 — Present

- Corporate websites, landing pages and online stores across industries, including hospitality, food service and tourism.
- Custom apps and systems: management dashboards, payment integrations and automations.
- Full ownership: discovery, design, development, deployment, maintenance and support.

EDUCATION

Computer Technician (technical secondary diploma) — Escuela Técnica N.º 32 D.E. 14 "Gral. José de San Martín", Buenos Aires, Argentina. Programming logic, systems architecture and networking.

LANGUAGES

Spanish — Native **Portuguese** — Intermediate **English** — Upper intermediate
